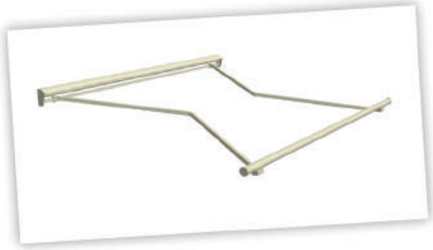
# SERVING FAMILIES IN THE INTERMOUNTAIN WEST SINCE 1941

Retractable patio awnings come in an extensive variety of fabric options and a selection of product features, allowing you to customize your outdoor living space to your taste and needs.

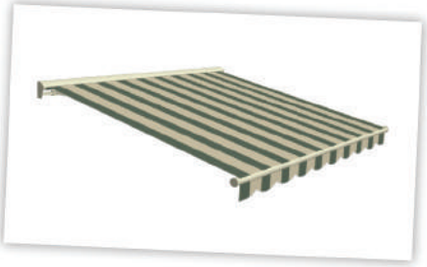
## OPTIONS:

- Wind Sensor
- Sun Sensor
- Handheld Remote Control
- Wireless Wall Switch
- Protective Hoods
- Roof Mount Brackets
- Custom Colors
- Drop Screens
- Home Automation Integration
- Motorized Drop Screen
- Manual Drop Screen
- Motorized Retractable Patio Awning
- Manual Retractable Patio Awning



## FRAME

- The retractable patio awning has the ability to fully extend, retract, or stop anywhere along the path of motion
- You may also adjust the pitch of the awning
- The awning must be retracted in strong winds to avoid damage
- Retractable awnings are designed for shade protection and light rain. They are not intended for use at all times and in all weather conditions



## VALANCE

The scalloped valance along the bottom of the awning is an optional feature available in many different sizes and styles

## FABRIC

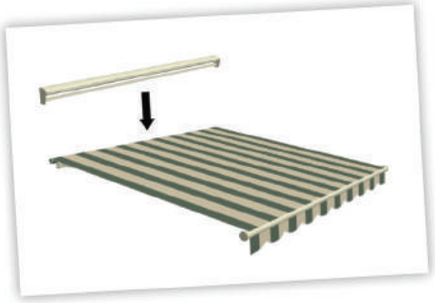
SugarHouse Awning's retractable patio awnings are made from fabric that is exceptionally durable and highly customizable.

### Our Fabrics:

- Are made with reliable, name-brand outdoor fabrics such as Sunbrella® and Dickson®
- Carry a 10 year limited warranty
- Numerous color options in both striped and solid patterns
- Optional drop screens use Phifer SheerWeave 4500 90% mesh

## HOOD OR CASSETTE ENCLOSURES

- The hood is an optional feature on most models



- It attaches to the awning frame and completely covers the roller and all moving parts
- The cassette enclosure on models K300 and G350 protects fabric and all moving parts when retracted
- This provides for extra protection from the elements with a clean, more finished look

## OPERATION

### Motorized Retractable Patio Awning

- Retractable patio awnings that are installed with an optional electric motor use a handheld remote control or a wall switch.

They can also be automatically operated by sensors for sun and wind

- Optional Somfy myLink technology allows you to schedule and operate your motorized awning from your phone
- Large retractable patio awnings require a motor in order to function properly
- Drop screens can also be motorized and controlled with your Telis 4 patio remote

### Manually Operated Drop Screens

- Manually operated awnings use a hand crank to raise and lower the screen
- The crank can be removed and stored when not in use

### Roof Mount

If needed, the awning can be mounted onto the roof using special roof mount brackets

Roof mount option is only available for the following roof types:

- Asphalt shingles
- Membrane roof
- Tar and gravel
