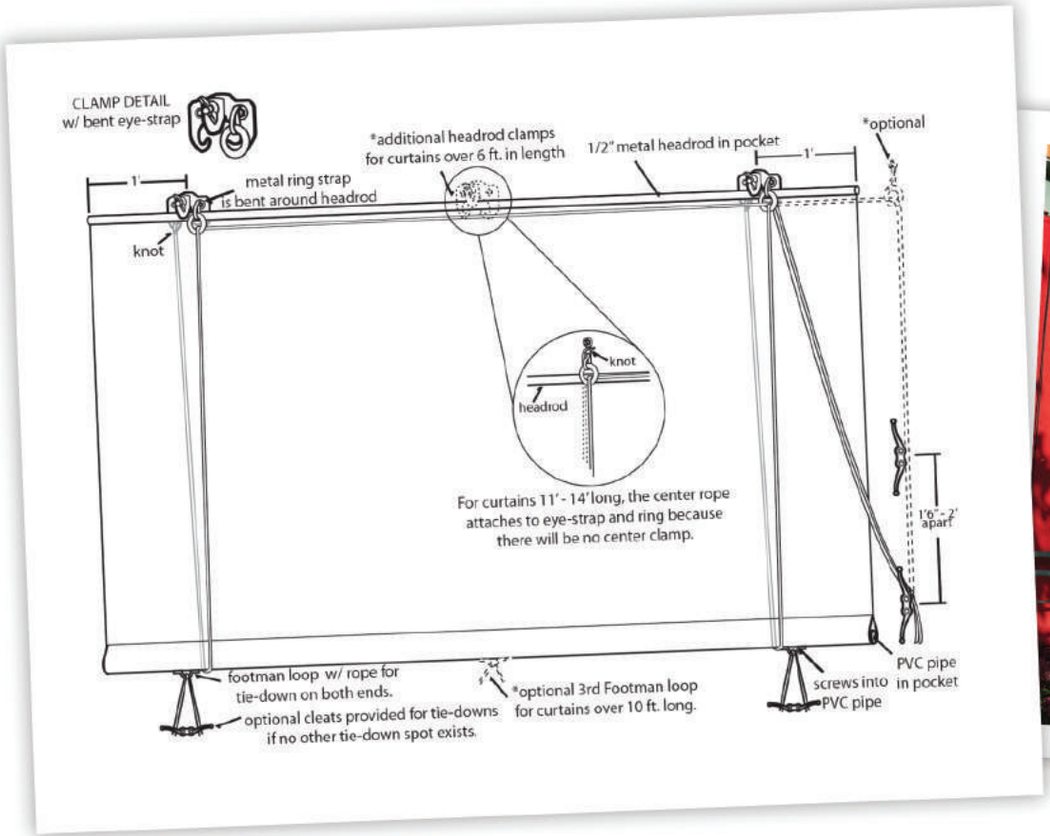
FABRIC

SugarHouse Awning's rope-operated drop shades are made from fabric that is exceptionally durable and highly customizable. For optimal shade we recommend using a 85%-95% mesh. Our mesh fabrics:

- Are made with reliable, name-brand outdoor fabrics such as Awntex® and Textilene®.
- Carry a 5-10 year limited warranty.
- Block the sun but not the view. Our vinyl-coated, polyester-fiber mesh fabric stops 85%-95% of UV rays.
- Come in numerous color options from which to choose.
- Are infused with Microban® technology, an antimicrobial that inhibits the growth of stains and odor-causing bacteria.
- Offer excellent shading advantages without trapping heat or airflow.

A solution-dyed acrylic material, such as Sunbrella®, is also available. Because it blocks nearly 100% of the sun and visibility, this material is ideal for both shade and privacy. Sunbrella® fabric comes with a 10-year limited warranty.



OPERATION

Rope-operated drop shades are simple to use. The process is similar to the one used by standard window blinds.

- To lower the rope-operated drop shade, simply loosen the ropes and let the drop shade roll down.
- To raise the curtain, pull all the ropes together and the drop shade rolls up.
- Tie-off cleats are provided to keep the extra rope neat and organized when drop shade is rolled up.
- Tie-down ropes are attached to the bottom of the rope-operated drop shade to secure the drop shade when it is rolled down. These tie-downs can be fastened to an existing object, such as a handrail, or to tie-down cleats installed by us.
